

Guaranteed Work Experience For an Unbeatable Advantage

Virtual Internships

End of Programme Report for:

Musrat Jahan
MetroBlue Tech Systems LTD
Charles Darwin University

Musrat Jahan

Charles Darwin University

Computer Science and IT Intern

MetroBlue Tech Systems LTD

Program Outcomes

**Would you recommend
VI to friends or family?**

5 /10

**Employment at the
End of Program**

Not offered future
employment/ extension
of internship

**Employment
Status**

Not Employed Nor
Currently Seeking
Work

Supervisor Feedback

What were the best qualities Musrat demonstrated during the internship?

Musrat demonstrated strong technical growth, ownership, and communication skills throughout her internship. She progressed from learning programming fundamentals to successfully building and deploying a lead scoring machine learning model, including data extraction, feature engineering, model training, and API integration.

She also showed excellent problem-solving ability, particularly when handling real-world challenges such as debugging integration issues between the ML module and backend API, and improving model performance through techniques like handling imbalanced data.

In addition, Musrat displayed notable leadership and collaboration skills during the testing phase. She took initiative in guiding team members, conducting structured handover sessions, and clearly explaining testing workflows and bug reporting standards. Her ability to document processes and support others ensured continuity and improved overall team efficiency.

Overall, her combination of technical capability, adaptability, and teamwork made her a valuable contributor.

What areas of improvement could Musrat continue working on?

Musrat can continue improving in a couple of key areas to further strengthen her professional impact. First, she should focus on deepening her system design and architecture skills, particularly in structuring scalable backend and machine learning systems. Taking time to study design patterns, API architecture, and deployment best practices (e.g., Docker, CI/CD pipelines) will help her build more production-ready solutions.

Secondly, she can enhance her advanced testing and validation practices, especially for machine learning systems. This includes expanding unit and integration tests, improving test coverage for edge cases, and learning tools for automated testing and monitoring. Exploring frameworks like pytest in more depth or learning about ML model monitoring techniques would be beneficial.

By strengthening these areas, Musrat will be better equipped to build robust, scalable, and maintainable systems in real-world environments.

Supervisor Feedback

Musrat has shown commendable dedication and growth throughout her internship. She consistently approached tasks with a willingness to learn, adapt, and improve, which was evident in her progression from foundational concepts to contributing to more complex projects like the Lead API and system testing. Her ability to take feedback, apply it effectively, and support her team members—especially during the handover phase—speaks highly of her professionalism and collaborative mindset.

She demonstrated a good balance between technical development and communication, ensuring that her work was not only functional but also well-documented and understandable to others. This is a valuable skill that will serve her well in any team environment.

I encourage Musrat to continue building on this strong foundation, stay curious, and keep refining both her technical and problem-solving skills. With consistent effort and focus, she has the potential to grow into a highly capable and impactful professional.

Detailed Explanation

Career & Self-Development

Defined as an intern proactively developing oneself and one's career through continual personal and professional learning, awareness of one's strengths and weaknesses, navigation of career opportunities, and networking to build relationships within and without one's organization.

Critical Thinking

The intern's ability to identify and respond to needs based upon an understanding of situational context and logical analysis of relevant information.

Communication

The intern's ability to clearly and effectively exchange information, ideas, facts, and perspectives with persons inside and outside of an organization.

Equity & Inclusion (Global Fluency)

The intern's ability to demonstrate the awareness, attitude, knowledge, and skills required to equitably engage and include people from different local and global cultures.

Leadership

The intern's ability to recognize and capitalize on personal and team strengths to achieve organizational goals.

Professionalism

Knowing work environments differ greatly, understand and demonstrate effective work habits, and act in the interest of the larger community and workplace.

Teamwork

When the intern builds and maintains collaborative relationships to work effectively toward common goals, while appreciating diverse viewpoints and shared responsibilities.

Technology

The intern's ability to understand and leverage technologies ethically to enhance efficiencies, complete tasks, and accomplish goals.

We use the NACE (National Association of Colleges and Employers) career readiness competencies as our guide.
