To whom it may concern,

RE: Reference for Ms. Musrat Jahan

This is to certify that Ms. Musrat Jahan completed a virtual internship at MetroBlue Tech Systems Ltd in the IT and Operations department from January 26, 2026 to April 17, 2026.

Musrat demonstrated practical experience in developing a lead scoring API, feature engineering, API integration, and software testing. She supported quality assurance efforts, identified system issues, improved reliability, and documented processes to support collaboration and smooth project handovers.

Musrat demonstrated backend development, feature engineering, API integration, software testing, and quality assurance skills. She also showed strong problem-solving, technical documentation, teamwork, communication, and knowledge-sharing abilities while applying practical development and testing methodologies.

Musrat demonstrated professionalism, initiative, attention to detail, collaboration, and communication skills. She consistently supported teammates, adapted quickly to technical challenges, and maintained a proactive and solution-oriented approach throughout the internship.

Musrat demonstrated strong potential for roles in backend development, machine learning engineering, and software quality assurance, with the capability to grow into advanced software and data-focused technical positions.

We wish Ms. Musrat Jahan the very best in future endeavours.

Yours Sincerely,

Gaji Abraham Ali
Operations Coordinator

Nweke, Chibuzor James
Chief Technology Officer (CTO)
